Web Development - Assignment 1

1. **Download** a text editor of your choice. I recommend **Visual Studio Code** since it is the one I will be using. The link to download Visual Studio Code: **https://code.visualstudio.com/download**

   - (DON'T get confused with Visual Studio — That is a different text editor and costs money!! Most text editors are free, don't pay if you don't have to.)

2. **Download** the extension Live Server if you are using Visual Studio Code. Use Live Server as you make changes to your html pages to see updates in real time.

3. **Create** a folder on your computer for this class where it is easy for you to find.

4. **Open** your text editor. Next, create a new html file in your text editor called ***assignment1YourName.html***. Make sure it is saved in your new folder for this class and that your actual name replaces the *YourName*.

5. **Replicate** the html page below. The purple is what each element is. If you don't know what something is, such as a descriptive list, google it! **https://www.w3schools.com/** is a great resource.

6. **Submit** the html file via Brightspace.

Everything You Didn't Need to Know   h1

The Story of Four Kitties   h2
